

Purpose: To validate the proposed “Value-Aligned Productivity Framework to Enhance Productivity of Distributed Teams during WFH” (VAPF)

Expected Time: 30-60 minutes

Criteria: To validate the proposed framework, experts shall meet the following criteria:

- A minimum of 3 years of work-from-home (WFH) experience and overall 5+ years of Distributed Software Development experience
- Knowledge of distributed and WFH challenges and best practices

Expert Information

Name (Optional):	
Role/Experience:	
Organization (Optional):	
Years of Experience in WFH:	
Years of Experience in DSD	
Overall total work experience	

I confirm that:

- I have relevant expertise in Distributed Software Development (DSD) and Work from Home (WFH)
- I voluntarily participate in this evaluation
- My responses will be used only for academic research

☐ Agree ☐ Disagree

*Disclaimer: Responses are anonymized and used solely for academic validation

Expert-Based Framework Evaluation Form

Section A– Overall framework Validation

	Conceptual Soundness & Theoretical Validity	1	2	3	4	5
1	The framework effectively cover the critical productivity-related value domains	☐	☐	☐	☐	☐
2	The framework provides a comprehensive solution to identified productivity challenges in DSD and WFH environments	☐	☐	☐	☐	☐
3	The proposed practices are implementable and effective in addressing the identified challenges	☐	☐	☐	☐	☐
4	The coherent and logical relationship among different layers and components of framework strengthens its effectiveness	☐	☐	☐	☐	☐
5	The framework, as a whole, improves individuals productivity in DSD	☐	☐	☐	☐	☐
6	The framework, as a whole, improves productivity of DSD teams	☐	☐	☐	☐	☐
7	The framework promotes effectively use of tools and resources that strengthens its effectiveness	☐	☐	☐	☐	☐
8	The framework effectively enhances long-term organizational performance by enabling sustained productivity improvement over time through continuous evaluation and monitoring outcomes	☐	☐	☐	☐	☐
9	Adoption of the framework can lead to sustainable long-term productivity improvements	☐	☐	☐	☐	☐
10	The framework can be implemented without imposing excessive organizational cost	☐	☐	☐	☐	☐
11	The expected productivity benefits of the framework outweigh the effort required for its implementation	☐	☐	☐	☐	☐
12	The proposed framework is effective and flexible enough to be adapted across different team sizes, organizational contexts in distributed WFH environment	☐	☐	☐	☐	☐
13	The framework is capable of delivering real and measurable productivity gains	☐	☐	☐	☐	☐
14	The effectiveness of the framework is realistic and achievable in real-world organizations	☐	☐	☐	☐	☐

Section B: Open-ended Feedback

1. Key strengths of the framework:

2. Suggested improvements and refinements:

Section C-Overall Expert Judgment

Statement	1	2	3	4	5
The proposed framework is effective in improving productivity of distributed software development teams during work-from-home (WFH) settings.	☐	☐	☐	☐	☐

Final Recommendation:

- ☐ Accept as proposed
- ☐ Accept with minor revisions
- ☐ Accept with major revisions
